## Aeroman breaks ground on hangar expansion

**MONTREAL, September 19, 2011** — Aeroman, a member of the Aveos Group, announced that it is adding a new hangar that will accommodate three new lines for narrow body aircraft at the maintenance facility in El Salvador for both existing aircraft (Airbus 320s and Boeing 737s) and the future Airbus A320 Neo.

“The new addition is a strong endorsement of the work that is being performed at this facility”, said Aveos President & CEO, Joe Kolshak. “There is increased demand from our customers for a high quality, on-time, cost-efficient product and by adding extra capacity we’ll be in a position to continue to both grow our business and satisfy our customers.”

The expansion will add about 82,000 sq. ft. to the existing 294,541 sq. ft. facility, bringing the total number of narrow body airframe maintenance bays to 11 following completion of the work.

Construction began on September 1st and is scheduled to be completed by April 2012. In keeping with the advanced architectural design of the building, the new extension will also be built on an innovative structural system that will facilitate accelerated construction work on the hangar.

“We are pleased to be given this opportunity to grow our facilities with the support of our long standing customers, particularly as we position ourselves for future growth,” added Mr. Kolshak.

### About Aeroman

Aeroman has been providing world-class heavy maintenance repairs, engine accessory replacement and inspections for nearly 30 years. It employs a workforce of about 1,500 with all technical personnel being FAA and EASA certified. Aeroman is ISO 9001:2000 certified and its reputation for quality and customer service has earned it the Corporate Diamond Certificate for Excellence from the FAA Aviation Maintenance Technician (AMT) Program in 2009. It is a founding member of the Airbus MRO Network and counts JetBlue, US Airways and Grupo TACA as some of its major clients.

### About Aveos

Aveos is a full-service maintenance, repair and overhaul (MRO) provider of airframe, engine, component and maintenance solutions to the aviation industry. From maintenance facilities across Canada and in El Salvador, we provide integrated services to over 100 customers, while leveraging a robust network of strategic alliances. Approximately 4,900 employees are committed to a tradition of providing world-class quality and expertise to customers. To learn more, visit [aveos.com](http://aveos.com)
